

Global Scene Case Study

ACCESS RECORDS MANAGEMENT

Access Records Management operates a unique business model in the management and storage of confidential and sensitive documents and digital data. With over 500 clients and 20 years experience, Access specialises in the rapid retrieval of documents stored in a high security Botany site situated 20 minutes from the Sydney CBD.

THE BRIEF

To analyse and quantify Access' actual resource consumption and identify any efficiency opportunities relating to the operation and carbon footprint of its Botany facilities.

THE STRATEGY

We conducted detailed energy and waste audits at the Botany site to define Access' current operations and identify efficiency and greenhouse gas reduction opportunities.

In conjunction with Sintesi Systems Development, we initiated the development of an ISO 14001 Environmental Management System (EMS). Through the energy and waste audits, we were

able to provide Access with an advanced starting point for the incoming EMS by providing it with baseline energy, waste and greenhouse gas emissions data, as well as the tools to minimise these.

THE RESULTS

Our consultants were able to identify significant resource efficiency opportunities representing **energy and waste cost savings of over 20% per annum**. This includes an upgrade to green power. Implementation of the recommended efficiencies will result in a **44% reduction in greenhouse gas emissions** for Access.

All of these benefits were identified while **achieving a 30% ROI**. We also developed a user-friendly emissions calculator to track the emissions produced by its fleet vehicles.

In collaboration with Sintesi, we are continuing to assist Access in the development and implementation of its Environmental Management System for future certification to the respected ISO 14001 standard.

THE BENEFITS

In demonstrating a commitment to managing and reducing its impact on the environment, Access has not only taken the first step towards sustainability, but realised significant cost savings potential in the process.

By leveraging its position and reputation within the records management industry through the pursuit of sustainable operations, Access is now able to offer its valued clients a more efficient and environmentally sound records management solution.

THE CLIENT'S FEEDBACK

"Global Scene were very professional in the way the audits and presentation of information were conducted. We thank them for their valuable input and look forward to continuing our work with Global Scene."

DALE ROCKELL – General Manager,
Access Records Management
